A Crushing Blow to the Whaling Business.

33 Ships Lost!

1000 Shipwrecked Seamen!

Circumstantial Account from Ship Masters.

By the arrival Monday, Oct. 23, of the Hawaiian whaling bark Arctic, Captain Tripp, we are in crushed or held fast so that they had to be abanloned. Fortunately, the weather was such that all the crews were safely got on board the vessels which were outside the pack, although in some instances, the utmost expedition had to be used to save life. In the case of the Roman, as described to us by one of her company, the sight must have been fearfully interesting. The floe caught the ship on each side, and lifted her up bodily, keel a vestige of the lately noble vessel in sight, forty- time, every one was anxiously expecting a N. E. five minutes from the time the ice first closed up- gale, but instead the wind continued from S. E. to

It is an open question as to whether any of these ships will be found on the return of spring, in a condition to be saved. It was considered of everything moveable.

of which will be severely felt in the homes and business circles of the East, as well as here and in San Francisco, we are indebted to Captains Tripp, of the Arctic, Kelley of the Gay Head, and Newbury, of the Paica.

May. About the 1st of June the ice opened some go down the coast until they came to the open sea, were heard spouting amongst the heavy ice, but About the middle of the month the ice opened and the fleet pushed to the north. A few whales were taken and picked up in crossing the Anadir Sea. Plover Bay the whales had all passed through the straits. The bark Oriole was stove and put into Plover Bay to try and repair. The fleet passed through Bhering Straits between the 18th and 30th the Japan, which was wrecked at Cape East last fall, not seeing any whales and finding large quantities of ice.

The whole fleet now engaged in catching walrus; these were very shy and scarce in comparison to former seasons, the boats frequently going 15 or 20 miles in the ice to get them; there was a good deal of fog in June and July, while they were walrusing, and also large bodies of ice. The east shore eing unapproachable until the very last of July. The latter part of July they had some strong winds atching, and the fleet now pushed to N. E. for Icy Shoals; at this time the wind was blowing be crushed or driven ashore by the ice the first rong from the N. E. for several days.

taken in this way, after a great deal of labor came in sight of the ships they found considerable bardship in sleeping out on the cold shore and difficulty in getting off to them, as the boats were ng the ice. On the 25th August it blew a strong loaded deep and the sea rugged. The bark Arctic

quite plenty, and a number were taken. The ships all got underway, and stood off shore and commenced whaling, every one thinking the ice was going off for good, and every opportunity was taken advantage of to catch whales. On the 28th, fine weather and light variable winds. On the 29th, light southwest winds, which freshened towards the latter end of the day, setting the ice in shore so fast that some of the ships were caught in the pack. The rest retreated in shore ahead of the ice. Here they anchored in from 3 to 4 fathoms

around the ships. By the strong current running to the N. E., the large heavy floe ice grounded in the shoal water; inside of this the ships lay, or at least the most of them, and those who did not get in kept working in as they had a chance, to keep from being stove. At this time it began to snow and they had several storms and winds from S. to N. W. Here they were all jammed close together, some not having room to swing clear of each other. On the 7th of Sept. the bark Roman was crushed by the ice. She having got caught while cutting a whale. She drifted helplessly with the ice as far as Sea Horse Islands, and was there caught between two heavy floes of ice, one of the floes was aground, and an immense floe of several miles in extent came against her from off shore, crushing her like an eggshell in 45 minutes. She sunk head foremost leaving her mizzenmast and her stern out of water, the ice having held her up until it separated. The Captain, officers and crew escaping over the ice with the boats, and not saving scarcely anything, except the clothes they had on. The crew were received on board the other ships. On the 2d Sept. the brig Comet was crushed in the heavy ice; her crew were taken on board the other ships, and cared It now became evident that the ice was setting on shore very heavily, the open strip of water receipt of truly disheartening news from the whal- became narrower every day, and no possible ing fleet lately cruising in the Arctic Ocean. The chance to get out. Still no one thought there greater portion of the fleet, numbering over thirty would be any difficulty of getting out the first N. vessels, has been caught in the ice, and hopelessly E. gale. On the 8th of Sept. the bark Awashonks was crushed between the heavy floe and the ground ice. Her crew were also received on board the other ships. As day after day passed and no signs of the ice opening, the masters of the ships became anxious about the loss of time, as the season was passing away. They were unwilling to believe that the ice would not go off shore, as in all their former experiences it had done at this time of the year. Nothing would be seen but one solid body of ice off shore as far as the eye could out. Relaxing its grip for an instant, the ship see, except the narrow strip in shore which was settled between the icy jaws of the floe, when from 200 yards to half a mile wide. The ships coming together again, she was crushed like an were lying, some jammed in the ice and some in eggshell, into atoms, and as the spasmodic relax- open water, all the way from Point Belcher to 2 or ation again occurred, she disappeared, leaving not 3 miles south of Wainwright Inlet. During all this

W. This kept the ice packing together more closely every day. The Masters of the ships now became seriously anxious about getting out of this perilous situation. The danger of their situation probable that in the first northerly gale, they was apparent to every one, and as the season was would all be destroyed by the moving heavy ice. advancing, there was great danger of being frozen Besides, the natives, who are numerous in the in, as the ice was making daily in the open strip of neighborhood, would, without delay, strip them water. Notice was now given, and a meeting was held by all the masters, in order to concert some For the following circumstantial and highly in- measures for the safety of their crews, in case they teresting account of this great disaster, the effects found it impossible to escape from their dangerous situation. It was decided to lighten the brig Kohola, and try to get her over the bar at Wainwright Inlet, on which there was 5 or 6 feet of water. This was done. She was hauled alongside the Charlotte of San Francisco, and her oil and stores landed on Allen, of the Minerva, Bliven, of the Eliz. Swift, her deck, and she was then found to draw 9 feet of Loveland, of the Reindeer, Nye, of the Eugenia, water. However, she was taken down the coast in the narrow strip of open water, close to the beach. About the 1st of May, 1871, the whaleships began and an attempt made to get her over the shoal to arrive at the ice south of Cape Thaddeus. They water. This they found to be impossible, as she found plenty of ice, and closely packed so that they drew too much water, and this was given up. At blew strong from the northeast most of the month of fitted out under the command of Capt. Fraser, to

N. W., always light from S. E., and fresh from S.

and let the ships up in sight of Cape Navarine. and then to try and find any of the ships which Here five or six whales were taken; a good many might have got out of the ice, or kept out, as it was known there were seven vessels to the south. they soon left. The fore part of June, the winds This was deemed expedient, as they were afraid were light and variable with a good deal of fog. that they would leave the east shore and go to the westward, and so remain in ignorance of the situation of the rest of the fleet. He succeeded in finding the barks and ships Arctic, Progress, Midas, By the time the ships got to Cape Bhering and Lagoda, Chance, Daniel Webster, and Europa, and the Captains of these vessels at once expressed their willingness to stay and wait for the crews of the distressed ships, as long as their anchors would hold them. Still hoping the ice would open and of June, some of them taking on board the crew of . let them out, in the meantime, Capt. Redfield of the brig Victoria tried to get his vessel off over the bar by lightning her, but without succeeding. On the night of the 9th of Sept., the weather was calm. and the clear water around the ships froze over. and it was with great difficulty that a whale boat could be got through it. The boats had to be coppered around the bows to keep the ice from cutting through the planking. No time was now lost in sending provisions by the boats to the south, as they were apprehensive that their retreat by the boats might be cut off, and it might be that they rom S. E. and N. E. This broke up the walrus would be obliged to travel by land to where the ships were anchored. It being well known among Cape. The ice began to disappear from the east every ship's company that there was not provisions here south of Cape Lisburne; the fleet pushed on enough to last over 3 or 4 months at the most. In to eastward, the main body of ice being in about case the ships escaped from the ice these provisions the Lat of 69 ° 10' or 15'; they followed the ice | could be taken on board again, for all hoped into the cast shore; they found a clear strip of water against hopes to the last. It was hard to entertain unning to N. E. along the land. In this clear water, any thoughts of leaving their ships, there being no hey worked up to within a few miles of Icy Cape harbor where they could winter, even had they id some of them anchored, not being able to pro- provisions enough to do. And more, they knew seed any farther on account of the ice lying on that if the ships did not get out they would either

northwest gale. On the 6th of August the wind moderated and the On the 13th of September another meeting was e started off the shoals. Several ships got under- held by the Masters, the painful fact having forced ay and passed the shoals, and in a few days the itself upon the mind of every one, that in order to set of the fleet were north of Blossom shoals. The save the lives of their crews they would have to sather was good, and they werked to northeast as abandon their ships. None but those similarly situas Wainwright Inlet; here they found whales, ated could tell how difficult it was for them to arrive ad a number were taken at once, but the ice being at this painful conclusion, and to winter was utterly ery heavy and closely packed, a great many were impossible, as their provisions would not last one-Et Still the prospect looked very favorable, and third of the winter, which is nine months in durapes were entertained of making a large season's tion in these latitudes. And then to what purpose tch. All the ships either anchored or made fast to could it be done, as there was no place of safety for heavy ground ice. Whaling was now carried on the ships; had they been in a harbor some of the takly for several days, the boats cruising among crews might have been left to take care of them, and pen ice, but on the 11th of August a large number | keep the natives from destroying them. But as they boats were caught in the ice by the wind shifting, lay in the open sea exposed to every storm, the The wind was from | chances were that they would all be destroyed by the west, and the ships were obliged to get under- ice. Under these trying circumstances they were by to keep from being jammed in the ice, and forced to come to the conclusion to abandon the ork in shore under the lee of the ground ice. With ships to save their lives, and the colors were acsiderable difficulty they succeeded in saving their | cordingly set as agreed on-at the mast-heads-to hats by hauling them a long distance over the ice, notify all the ships companies to get ready to leave of them being badly stove by so doing, but on the 14th of Sept. The Masters of the distressed y were all saved finally. The ice kept setting on vessels knew if they were caught by the bad weather, re steadily, and the ships kept fleeting into shoal the chances were that they would never get back er to avoid being stove, and some of them again, after being blown off. Thus, although they anded, but were easily got off again. On the were ready to stay any length of time by their ships the ice stopped, having grounded, leaving an as long as they could be sure of a ship to take them a strip of water along the land as far as Point off at the last moment, and that time had now arther. Boats were kept off whaling every day. rived, and as every one regretted leaving their wand heard plenty of whales among the ships, still there was no alternative. Starvation and by ice, but could not get to them at this time. death awaited them should they be obliged to stay ; had a great deal of fog at times, clearing off accordingly, boats were loaded with such provisa short time. All this time the ships were lying ions and clothing as were absolutely necessary, and ely anchored and tied up to the ice, waiting for it by 4 P. M. every ship's company had left, and were open off the land, as they expected it would on their way south. As they made their way down first strong northeast wind that blew. In the the coast they found the ice much worse than they antime reports were brought of plenty of whales had any idea of, and a great deal of shoal water Ig seen off Sea Horse Islands, and several ships besides, so that even if they had succeeded in getting t boats up there with orders to catch and out the the brigs over the bar at Wainwright Inlet, they ales on the ice, (they carrying everything neces- never could have got them in the clear water south ! y for so doing) and tow the blubber to the ships, At night they camped on the beach, and at daylight here was no chance to get there with the ships, on the 15th, they proceeded on their way to Icy count of the ice and shoal water. Four whales | Cape ; it blew strong from the south, and when they

heast gale, and the ice opened and went off Midas and Progress, lost each an anchor in trying to

kindly received on board these ships—seven in number as before mentioned. The boats were cut adrift, as it was impossible to save them, the ships being so crowded. On the 16th, the last boats, crews were taken on board, and the wind blowing strong from NW, they weighed anchor and steered to SW, it having been agreed between the Captains of the ships to proceed to Plover Bay, and there get water and wood to last them on the passage to the Sandwich Islands. This was done by five of the ships, the Arctic, Progress, Midas, Lagoda and water, the ice coming in and the small ice packing | Europa, which arrived there on the 24th, and sailed again on the 25th. The distance traversed by the boats after abandoning the ships before reaching the ships South of Icy Cape, was about 70 miles; the ice being in one solid body all the way to Icy Cape, leaving a narrow strip of clear water along the beach -the entire distance-but also very shoal. Annexed is a list of the names of the abandoned ships and the amount of oil each ship had taken up to the time

they were lost, and as they lay in rotation along the

Terrible Shipwreck and Loss of Eleven Lives!

By the arrival Sunday, Oct. 22d, of the steamer Moses Taylor, we have the following distressing account of human suffering and loss of life at sea. The brig Shellehoff, Captain Hopkins, it will be remembered, took a cargo of cattle from these islands to Tabiti in December of last year.

The following statement from the pen of H. M. Whitney, Esq., who was a passenger by the steamer, will be read with absorbing interest.

On Thursday, Oct. 17, at 8 A. M., a sail was discovered by the wheelman on the steamer Moses Taylor. The vessel lay directly in the steamer's track, and appeared to be disabled, having but one mast standing, and only her lower topsail set, running before a fresh south-east wind. On approaching her, it proved to be a brig, water-logged, with her mainmast carried away, apparently deserted, no persons appearthe forecastle, and a tent rigged in the foretop cross-trees, showed that the crew had occupied these places for some time. At every lurch, the sea made a clean breach over the vessel from stem to stern. To all appearance it was a wreck which had long been water-logged, and her crew taken off by some passing vessel. Her stern was broken away, the bulwarks on both sides gone, and her sails flying from the foremast in

On reaching the wreck, the steamer stopped, and Captain Bennett sent off a boat to ascertain whether any persons were on board, and if none. whether any record could be found respecting her. The sea being quite rough, the brig lurched heavily, and the boat approached her with some difficulty. She was boarded, however, by the third officer and a seaman from the steamer, who immediately went aloft into the foretop, and finding no one, went into the forecastle, where hey discovered a weak, emaciated man, whe exclaimed, as he saw them: "Great God Almighty! am I saved?" He was lifted into the boat, and taken to the occame, the only article brought with him being a small canvas bag containing nautical almanac, and a vial inclosing a sheet of paper, with the date of the wreck and names of the crew and passengers.

It proved to be the American brig Shelehoff, 213 tons register, of San Francisco, bound to Callao with a cargo of lumber. The survivor was Capt. Luder Hopken, the last of twelve persons on board at the time of the disaster. The brig was caught in a cyclone on the night of July 3, the same date of the solar eclipse. Soon after midnight, when the cyclone was at its height, she was thrown on her beam-ends, and found to be rapidly filling, and in order to prevent a total loss of the vessel and her company, her mainmast was cut away, and she righted up. No time was allowed to save any provisions or clothing from the cabin, and the crew were obliged to retreat to the foretop to prevent being washed overboard, as every wave made a clean breach over her. The mate, Mr. Johnson, died first, six days after the disaster. Two half-barrels of salmon, a half-barrel of tongues, and a box of Chipa starch were fished up out of the hold, but the drinking water was all found to be brackish. The salmon, tongues, starch, and a few fish caught with a hook from time to time, and occasionally a little rain-water caught in a sail, and always more or less brackish from the salt spray, were all that the ship's company had to subsist on.

Capt. Hopken's account of the sufferings of his men and passengers is a most heart-rending one. After the death of the mate, on the 9th of July, none occurred till Sept. 6, when they began to become delirious and weak from hunger and thirst, and several died, or jumped overboard in their delirium. Boils and disease, induced by hunger and salt-water, added to the intensity of Nine or ten days before the steamer rescued

him. Captain Hopken states that a bark ran down to the wreck, hove to for a few minutes, and then squared away without sending off a boat or making any effort to rescue the lives of those on board, of whom there were then eight living. The bark came so near that persons could be seen moving about on her deck. Those on the brig were so weak as to be unable to stand, but got on their knees and waved pieces of sailcloth, oping to attract attention. Their feelings as they saw the bark square away, when so near them, may better be imagined than described. Their last hope being gone, they lay down, and one after another died or leaped overboard. The bark displayed no flag, and all that Captain H. can recollect of her appearance was that she had a new bright spanker set.

Soon after the disaster occurred, Captain H. set the foresail and jib (the only sails used), and rigged the rudder so as to steer the wreck from the foretop. This was accomplished by running the rudder-ropes through a block aft, and then carrying them forward to the foretop. In this way the brig's course was shaped towards these islands tolerably correct, without compass or chart. The accident occurred in N. lat. 16 and W. long. 117, about 520 miles south-west of Cape St. Lucas. The wreck was fallen in with in N. lat. 26.40, W. long. 148.52, about 400 miles north-east of Hawaii, showing that they had run nearly 2,000 miles in 109 days.

The brig sailed from San Francisco June 22d, with 210,000 feet of lumber on board. The deckload was swept off by a heavy sea soon after she became water-logged, and a portion of the lumber in the hold worked out the stern, which was carried away. What remains is probably rendered worthless by the worms. The foremast was loose, and will be carried away in the first gale. So that the vessel and cargo may be set down as

Too much praise cannot be given to Captain Bennett, of the Moses Taylor, for sending a boat from the steamer to examine the wreck, which, to all appearance, was abandoned, and when nine out of ten shipmasters would probably have thought it a waste of time to stop and examine her condition. But his humane course has saved the life of one person, whose gratitude no words can express. If the passage of the steamer has been a long one, caused by constant head winds, compelling her to deviate from the usual course, it is a satisfaction to know that an all-wise Providence directed the winds and guided the helm, and led to the rescue of a human being, who had existed for 109 days literally without bread and water, and endured sufferings which few mortals could survive. The facts given in this narrative should teach shipmasters never to pass a wreck without ascer-taining, if possible, whether any persons remain c. On the 27th had good weather, whales were | boid on to take them on board, they were very | on board.

In conclusion, Captain Hopken desires me to express his heartfelt thanks to Captain Bennett. Dr. Woodbridge and Mr. Beals, who so kindly nursed him, and to the passengers on board the Moses Taylor, who have contributed so liberally to his wants.

HENRY M. WHITNEY, Passenger.

The following paper was prepared by Captain Hopken Sept. 10th, on board the brig, to be left in case no one survived. It gives the list of crew and passengers:

American brig Shelehoff, of San Francisco. was waterlogged on the 3d of July, 1871, in a hurricane, lat. 16° north and long. 117° west. Was affoat till Sept. -. This was written on the 10th Sept., 1871,

Capt. Luder Hopken, Master, San Francisco; Mate, T. Johnson, of Schleswig Holstein; Second Mate, James MacCarley, Port Petrice, Migdonshire; Steward, Phillip Dunn, San Francisco. Seamen—Levedore Police, Rebosto Sicilia, Mitchell Velago, Bajerro Calabria, Italy; Andrew Larssen, Sweden; Lona Lewis Nessen, Flensburg, Germany. Cabin Passengers-Ashley Crane, Charles Davis, San Francisco; Charles Kurtz, Tubingen, Germany - [New York papers copy]; Bartholmew Clawell, native of Charleville, Department de Sardensu, (France ?) Written on board the brig Shelehoff, Monday, Sept.

10, 1871. We have suffered hard from hunger and Crew, passengers and officers beg to send this to San Francisco, California, and publish in the papers.

In the Nautical Almanac were found the following entries: July 3d, Cyclone; vessel waterlogged. Sept. 6-Andrew Larssen died.

18-Lewis Nessen died. 22-Bart, Clawell died.

21-On the wreck 80 days; 92 days from San Francisco. No rain. Nothing to eat. Saturday, Sept. 30-We are on the wreck 89 days. Four dead. Please advertise this in papers. Monday, Oct. 15-105 days on the wreck. All hands dead, except the Captain and one passenger-Crane.

A CARD. Honolulu, H. I., October, 1871. To Capt. N. T. Bennett, of S. S. Moses Taylor : DEAR SIR .- I desire by this, the only means in my power, to return to you my sincere and heartfelt thanks for the Christian charity and great gallantry shown by yourself, your officers and crew, in rescuing me from a deplorable and hopeless position upon the wreck of the brig Shelehoff, upon Wednesday, Octo-ber 19th, 1871, after I had given up all hopes of life, having already passed one hundred and eight days upon the waterlogged wreck of my vessel, and seen one after another, my crew and passengers

perish of thirst or exposure. I wish Sir, you would thank the boat's crew that took me from the wreck, and also all your officers for their kindness and attention during the time I passed on board the Moses Taylor, and the passengers for their kindness in subscribing so liberally for my Rest assured Sir, that I shall never, while I live,

forget your kindness to me, and I hope that your future life may be as successful and fortunate as you I remain Sir, with sincere gratitude, your obedient LUDER HOPKEN.

Late Master of brig Shelehoff.

Effects of the Fire. The great fire in Chicago by which perhaps \$100,-000,000 worth of buildings and merchandise has been destroyed, is a great calamity for the whole Union. But it fully illustrates the excellence of that modern system of insurance which spreads the loss over this country and Europe, by making the capital of all responsible for the local loss of a few. At the first blush Chicago has lost perhaps \$100,-000,000, a very heavy loss, but of that \$80,000,000 has been insured, that is for a small premium, most of the insurance companies of the Union and Great Britain have agreed to pay the amount. It results that Chicago in the next ninety days must receive \$80,000,000 in cash, to be applied to the restoration of the ruined buildings. Of the uninsured balance of merchandise the merchants of New York and elsewhere who sell on credit will have to bear their proportion. The insurance effected in Illinois companies in excess of their assets will not be realized in all probability. But from other sections it will be available. The San Francisco Fire Companies, whose aggregate assets are \$5.500,000, baye of late taken risks in Chicago, and these risks have been estimated as high as \$3,000,000, in legal tender, but closer investigation is reducing the amount and it is very possible that \$2,500,000 may ultimately be required to be paid over in the next ninety days. This amount is to be realized from the securities of the companies, which are of the the capital which has been accumulating of late, in excess of demand, and at lower rates of money than those to which we have heretofore been accustomed. The effect, therefore, of this remittance of \$2,500,000, if it should prove so much, may be a slight rise in the rates for money on long terms. That is all that the payment, by San Francisco, of that amount of money could effect. Larger amounts of money have been clandestinely with-drawn from this market to feed gold and other speculations in New York, without attracting attention at all, and during the last year millions of dollars, for the purchase of mines and the use of railroads have come into this State without public notice. When men's minds are excited by an unusual calamity, the wildest forebodings are indulged in, and, we are sorry to say, promoted by men who seek in the depreciation of property, favorable investments. There is no denying that the loss is a heavy one to the local companies, but they have all held meetings of Directors, and only with one result, viz. : to meet the case fairly and squarely, to discharge the claims and to continue business as usual. The card of the Phœnix Company will be found in another column. The Union. Fireman's Fund and the others meet the matter in a similar spirit. There are none but will have some surplus of assets, and while they meet the claims upon San Francisco, as she has always met her liabilities, the public will rally to the support of those companies who have represented her in financial integrity and ability abroad. There may be some reorganization of some of these companies, and the discussion of the advisability of doing a foreign business may come up. There are those who think the home business should be adhered to, but it is probable that the Chicago companies are not of that opinion. Experienced underwriters advocate a multiplicity of small risks extended over a large surface. The general result is now, that notwithstanding this most terrible fire that the world has known, at least in modern times, there is no liquidation of any San Francisco companies, but simply the remittance of perhaps \$3,000,000 to Chicago in the course of ninety days, and that is not a sum to cause inconvenience. It is within the range of probability that active men in Chicago, brown out of business on the eve of a severe Winter and surrounded by desolation and high rents, may, furnished with the cash of insurance, seek other localities. St. Louis, Omaha, and our own San Francisco, which, since the opening of the railroad, has with its resources, capabilities and climate, become favorably known to our Chicago
